

## U-profiles

The standard solution for framing (perforated) plate, expanded metal, and some types of wire mesh. The depth of the frame profiles means that the material being framed does not need to be cut to an exact size.

### material

steel, galvanised steel, stainless steel, aluminium.

### material thickness

Approx 1 - 1.5mm for steel and approx 1 - 2mm for aluminium, depending on the size of the opening.
